

## MAJOR EQUIPMENTS IN ELECTRICAL ENGINEERING LABORATORY – II

Sr. No.	Item Description
1	Regulated Multiputput DC Power Supply
2	IGBT Power module with driver circuit
3	Thyristor Power module with driver circuit
4	Arbitrary Function Generator
5	LCR-Q Meter
6	Precision Magnetic Analyzer
7	Single Phase Digital Power Meter
8	Digital Multimeter
9	Power Scope Oscilloscope
10	FPGA Kit for Power Electronics
11	Control Simulator
12	Electrical Machine Test Bench
13	Programmable Logic Controller (PLC)
14	DC Motor
15	AC Current Probe
16	Digital Power Scope
17	Temperature Control Modules
18	Lift Control System
19	BLDC Motor
20	Real Time Controller Board
21	Programmable AC Power Supply
22	Power Electronic Drives and Motor setup
23	Three Phase Induction Motor with Mechanical Loading
24	PMDC Motor with Encoder
25	Single Phase Power/Harmonics Analyzer
26	Permeant Magnet Synchronous Motor
27	DC series Motor
28	Instrumentation Trainer Kits
